

API Journeys

Monday, April 13, 2026 3:22 PM

View List of Published Journeys Configs

FreshserviceFreshservice for Business Teams

Note:

1. Only users with View Journeys privilege or Account admins with Play god privilege can access the following API.
2. By default, top 30 published journeys will be returned. To get more journeys use the parameter page

This API retrieves all Journey configurations that have been published.

get/api/v2/journeys/configs

OAuth 2.0 Scope

freshservice.journeys.view

Sample code | Curl

```
curl -v -u api_key:X -X GET 'https://domain.freshservice.com/api/v2/journeys/configs'
```

Response

```

View Journey Initiator Config Form Fields FreshserviceFreshservice for Business Teams

This API retrieves all fields from the Initiator Form of a Journey configuration.

Note:

Only users with View Journeys privilege or Account admins with Play god privilege can access the following API.

Field	Type	Description
place_holder	string	Placeholder of the fieldRead-Only
label	string	Label of the fieldRead-Only
name	string	Name of the fieldRead-Only
type	string	Type of the fieldRead-Only
position	number	Position of the fieldRead-Only
required	boolean	Indicates whether the field is required or not during form submissionRead-Only
data_source	number	Indicates the type of Datasource. This value will be available only for field_type: "custom_lookup_bigint". Please refer the Data source table to know moreRead-Only
deleted	boolean	Indicates whether the field is deleted or notRead-Only

Lookup Datasources

The Journey Config form may contain Lookup fields with Datasource. Lookup Datasources are entities where we can search data from them. The numerical value for each DataSource (Department, Location etc.) is given below.

Source	Value
locations	1
Requesters	2
Agents	3
Assets	4
All Users	5
Departments	6

Filter Journey Requests FreshserviceFreshservice for Business Teams

This API retrieves a list of Journey Requests that match the specified filter criteria.

Note:

1. Only users with View Journey Requests privilege can access the following API.
2. Input for date fields should be in UTC Format.
3. The number of objects returned per page by default is 30 also the total count of the results will be returned along with the result.
4. To scroll through the pages add page parameter to the url.

Supported Ticket Fields

Field	Type	Description
type	number	Journey Type of the Journey.
requester_id	number	User ID of the requester
journey_id	number	ID of the journey
owner_id	number	User ID of the Journey Request Owner
requested_for_id	number	User ID of the user for whom the journey request is requested
status	number	Status of the Journey Request
created_at	date	Journey Request creation date (YYYY-MM-DD)

The below table lists the status for Journey Requests

Status	value
In Progress	1

Completed	2
Failed	3
Cancelled	5
Expired	8

Note:

Queries can be combined using AND

<https://domain.freshservice.com/api/v2/journeys/requests/view>

Add the query in the body of the request in the following format:

```
{ "data": { "query": { "filter": [ { "attributes": [ { "field": "journey_id", "operator": "is_in", "value": [ 1 ] } ] } ] } }
```

[post](#)/api/v2/journeys/requests/view

Request

```
{
  "data": {
    "query": {
      "filter": [
        {
          "attributes": [
            {
              "field": "type",
              "operator": "is_in",
              "value": [1]
            },
            {
              "field": "requester_id",

Additional examples

1. Get the list of Journey Requests for a particular journey_id (1)

```
curl -u api_key:X -H "Content-Type: application/json" -X POST -d --data '{"data": {"query": {"filter": [{"attributes": [{"field": "journey_id", "operator": "is_in", "value": [1]}]}]}}' https://domain.freshservice.com/api/v2/journeys/requests/view
```

2. Get the second page of journey requests with type as (type: 1)

```
curl -u api_key:X -H "Content-Type: application/json" -X POST -d --data '{"data": {"query": {"filter": [{"attributes": [{"field": "type", "operator": "is_in", "value": [1]}]}]}}' https://domain.freshservice.com/api/v2/journeys/requests/view?page=2
```

3. Get the list of Journey Requests created between a particular time period (from: 2025-06-06T00:00:00+05:30 to: 2025-07-06T23:59:59+05:30)

```
curl -u api_key:X -H "Content-Type: application/json" -X POST -d --data '{"data": {"query": {"filter": [{"attributes": [{"field": "created_at", "operator": "is_between", "value": {"from": "2025-06-06T00:00:00+05:30", "to": "2025-07-06T23:59:59+05:30"}}]}]}}' https://domain.freshservice.com/api/v2/journeys/requests/view
```

4. Get list of Journey Requests with requested for a particular user (4006)

```
curl -u api_key:X -H "Content-Type: application/json" -X POST -d --data '{"data": {"query": {"filter": [{"attributes": [{"field": "requested_for_id", "operator": "is_in", "value": [4006]}]}]}}' https://domain.freshservice.com/api/v2/journeys/requests/view
```

5. Get the list of Journey Requests in Completed and In progress status And assigned to a particular user (4006)

```
curl -u api_key:X -H "Content-Type: application/json" -X POST -d --data '{"data": {"query": {"filter": [{"attributes": [{"field": "status", "operator": "is_in", "value": [1, 2]}, {"field": "owner_id", "operator": "is_in", "value": [4006]}]}]}}' https://domain.freshservice.com/api/v2/journeys/requests/view
```

Additional examples

1. Get list of Journey Requests that are completed by the agent whose credentials were used to make this API call.

```
curl -v -u api_key:X -X GET 'https://domain.freshservice.com/api/v2/journeys/requests?filter=completed'
```

2. Get list of Journeys Requests in the descending order.

```
curl -v -u api_key:X -X GET 'https://domain.freshservice.com/api/v2/journeys/requests?order_type=desc'
```

3. Get the second page (Journey Requests from 11-20) of a list of all Journey Requests.

```
curl -v -u api_key:X -X GET 'https://domain.freshservice.com/api/v2/journeys/requests?per_page=10&page=2'
```
